Agriculture forms the major source of occupation and income in India. We are taking a step to bring technology to agriculture.

As a first step towards this we have launched 'Jalad'. We know pump operating is integral part of agricultural working. Farmers have to water the farms even at odd hours depending on watering cycle and availability water and electricity.

Using 'Jalad', we offer a solution where just by sending SMS or calling 'Jalad', you can turn it ON/OFF. If farmer visits the farm during late hours, he needs to switch ON the light, so this facility is also provided. 'Jalad' can be used with all available starters.

COMMAN FEATURES:

- 1) Saves farmer time, Power, Money and petrol/Diesel.
- 2) Advanced Micro-Controller Technology
- 3) Works for 3 phase and single phase motors too
- 4) Switch ON/OFF two Pumps and one bulb/Tubelight.
- 5) Operates directly on 230V AC
- 6) Safe Casing to protect in environment
- 7) Easy to operate.
- 8) Works with existing starter
- 9) Extension for multiple motors

USING JALAD YOU WILL SAVE (approx) :

Your farm (kms)	Petrol cost Saved (RS/ month)	Diesel cost saved (Rs/ month)
5	230/-	132/-
10	460/-	264/-
20	920/-	528/-
30	1377/-	792/-
40	1836/-	1056/-
50	2295/-	1320/-
